

# After Brexit, Bregret!

Four years after Brexit, the United Kingdom's exit from the EU, the British are expressing their regrets.

On 23 June 2016, when asked whether the UK should remain a member of the EU, 52% of British people answered "Leave"!

- City dwellers
- The Scots
- Young people

For "Stay"

- The elderly
- Rural people
- The unemployed

For "Leave"

## What was promised during the pro-Brexit campaign

By leaving the EU, UK could save £350 million a week and allocate it to the Social Security system.

By leaving the EU, the country would have regained control over immigration.

## What we see today :

Gross domestic product down by 0.3% in 2022.

Inflation exceeded 10%, triggering a serious crisis and historic strikes.

Brexit is costing the UK economy £100 billion a year, with effects ranging from business investment to their ability to hire workers.

Illegal immigration reached record levels in 2022, just as the UK's exit from the EU was supposed to enable it to regain control of its borders.

31.01.2020  
UK leaves the  
EU.

24.12.2020  
The 2 parties  
reach a  
commercial  
agreement.

31.12.2020  
End of the  
transition  
period.

01.01.2021  
UK leaves the EU  
single market.

**Between 55% and 60% of British people now regret having left Europe. Young people are even more likely to regret leaving.**
